Patient Characteristics & Outcomes
Fracture of Lower Extremity

This information describes the patient characteristics and outcomes for patients in the program during the most recent year…2017.

Patients in most recent year: 49

Average Days in Program:	**BTAR**	**Nation**
	13.5	**12.0**

Average Hours of Therapy per Day: **>= 3 hours; 5 out of 7 days per week**

Source: Uniform Data Systems for Medical Rehabilitation

Age Group	Percent of Patients
0 – 44	0.0%
45 – 64	20.4%
65 – 74	24.5%
75 – 140	55.1%

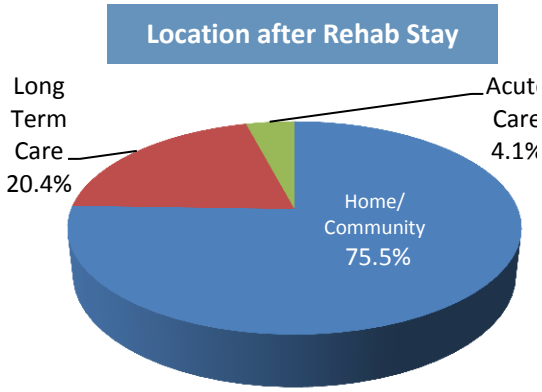
Gender	BTAR	Nation
Male	34.7%	32.6%
Female	65.3%	67.4%

Ethnicity	BTAR	Nation
Caucasian	79.6%	84.2%
African American	20.4%	4.8%
Native American	0.0%	0.4%
Hispanic	0.0%	5.1%

Functional Improvement	BTAR
Patients Achieving Personalized Improvement Goals	48.7%
Degree of Functional Improvement in…	
Self care	64.8%
Bowel & Bladder Control	53.4%
Locomotion (Walking/Stairs)	167.8%
Bed, Toilet, Chair Transfers	100%
Communication	9.0%
Interaction/Memory/Problem Solving	15.2%

The ability to return to home is a key outcome for the Program. BTAR's Inpatient Rehab Program discharges a higher percentage of patients to home than other rehab programs throughout the nation.

Source: Uniform Data Systems for Medical Rehabilitation



Functional improvement is determined by comparing patient's abilities in each category at the time of admission to Rehab as compared to patient's ability at discharge.

Patient Satisfaction Overall Rating:	**93.8%**	**79th Percentile**
Likelihood of Recommending Facility:	**91.6%**	**69th Percentile**
